

Newly released TR 4 soundtrack in MP3 format

Re-released 67 track album for the "Tomb Raider IV - The Last Revelation Soundtrack by Peter Conz Connelly in high quality CD Audio format (and not using the archaic audio compression scheme as in TR4/TRLE). Original CD Audio wav files are [here](#)).

I converted them to MP3 format to be used with TRNG & TREP (using bass.dll).

TRLE tracks are renamed accordingly (-> 005_Secret.mp3 etc) and can replace the respective original TRLE wav files. (A batch file to delete the respective wav files is included)

The composer himself introduces the content:

"Please let me introduce to you the COMPLETE soundtrack to "Tomb Raider IV - The Last Revelation". This set also contains JUST the music from Cutsscenes and FMV, the first time they've been available without sound effects. I have also included a track which was intended for the Intro FMV but scrapped in favour of the one that made it to the game. Music by Peter Connelly."

All credits go to Peter Conz Connelly.
